

# CUSTOM SOUND DESIGN

Leon's attention to detail stems from their close working relationships with architects and interior designers, as well as with traditional A/V integrators. They study modern home building trends and closely follow the latest industry innovations. At Leon, every installation is a singular work of art. Their desire to achieve an optimal design is undeniable, as evidenced by the many remarkable systems they have created to date for their clients.

Leon's extensive variety of custom options allows for easy integration of high fidelity audio into any room. Whether building speakers to match the exact dimensions of any TV or custom finishing speakers to match any décor, Leon's build-to-order approach offers flexibility that no other speaker company can provide. At Leon, there are no limitations.

The fully customized Leon Speaker is infinitely accommodating to its surroundings, especially in the realm of home design. Any aspect of the speaker (cabinet, grill, cover, etc.) can be customized to the needs of a client. Speaker cabinets can be matched to the grain of an imported Brazilian wood, if need. Speaker covers for an in-wall installation can be made to look like a register cover to seamlessly mold to the look of a room. A custom gallery wrap option allows speakers to be wrapped with any graphic or pattern. An almost limitless list of design options gives the Leon staff the ability to craft a truly innovative solution that will accommodate the requirements of any customer.

No finished inventory is kept in the Leon warehouse facilities because all products are constructed on a build-to-order basis for each client. Only the raw materials necessary to build the finest loudspeakers possible can be found there. This approach allows Leon to always provide their customers with exactly what they want, when they want it. Attentively listening to their needs of their clients and dealers is a key element of their success in the fast changing environment of the consumer electronics industry. As a fully build-to-order facility, Leon has the ability to respond to very quickly to industry changes. This equates to more advanced product development, better customer service and striking design innovation. With Leon, anything is possible.

## EVOLVING INNOVATION

By Luis Cavallo

To create art is to create something that is one of a kind, a product of one's imagination that will never be the same as another. There is something very special about owning a custom designed item. In today's modern society there is strong demand for uniqueness and artistic design. This is the plane that the Leon Speaker exists on. An exceptional speaker with an artistic edge.

At Leon, picture perfect sound starts with the hands. Their craftsmen design and build some of the world's finest home theater products. Their passion for perfection is evident in every step of the manufacturing process. From the moment an order is placed to the final finishing touches, meticulous attention is paid to every cabinet, driver, screw and design.

Leon's signature sound is a culmination of fine art, acoustic engineering and craftsmanship. For over ten years Leon has been dedicated to creating speaker solutions that best capture the spirit of the source where the sound is created. Their goal is to get as close as possible to perfectly reproducing audio just as if it were coming from the original source. Each speaker is built with extreme care using the finest components to deliver a dynamic
